

Report

The fourth project was super easy for me. I only found it a little challenging to understand the code for the tic tac toe game. I am still figuring out how to code better with JavaScript and jQuery, but I think I am getting the hang of it and by the end of the semester I will completely understand it. While creating my assignment in Brackets, I continuously saved and opened a preview of my web page in Google Chrome. I liked seeing my tic tac toe game develop each time I tested it. I found that this assignment took me about 2 and a half hours to complete as I had to find a bootstrap I liked and turn the tic tac toe code into my own version of it that I found visually appealing. Overall, I had fun designing this game and using a new coding language.
